

# Iridium GPS 2 on BOREL

PI: J. Legrand, Ifremer, France

## PARAMETERS

- Latitude (°)
- Longitude (°)
- GPS validity
- Number of satellites

## LOCATION

|               |                       |
|---------------|-----------------------|
| Regional node | Emso-Azores           |
| Site          | Lucky Strike          |
| Node          | <a href="#">BOREL</a> |
| Coordinates   | 37.289 °N 32.275 °W   |
| Depth         | Surface               |

**Comment from PI:** Iridium antenna is mounted at the top of the BOREL superstructure. The electronic unit is placed inside the UGB (Buoy Electronic Management Unit). There is no central data storage available on the buoy.

## SENSOR METADATA

**Type:** GNSS Reference Server

|               | 2013-14                | 2012-13                | 2011-12                | 2010-11                |

| Provider      | Nal Research           | Nal Research           | Nal Research           | Nal Research           |
| Serial number |                        |                        |                        |                        |

### Operating parameters

Sampling period 6 hours

## DATA MANAGEMENT

Real time data transmission: **Full**

Data storage in the Communication and storage unit:

Data storage in the instrument: **No**
