

Meteorological station on BOREL

PI: J. Legrand, Ifremer, France

PARAMETERS

- Horizontal wind speed (knots)
- Wind from direction relative north (°)
- Air temperature (°C)
- Atmospheric pressure at sea level (mbar)

LOCATION

Regional node	Emso-Azores
Site	Lucky Strike
Node	BOREL
Coordinates	37.289 °N and 32.275 °W
Depth	Surface

Comment from PI: The meteorological station is mounted at the top of the BOREL superstructure. There is no central data storage available on the buoy.

SENSOR METADATA

Type: Meteorological station

2010-11

Model Rowind+

Provider Furuno

Serial number

Operating parameters

Sampling period 6 hours

DATA MANAGEMENT

Real time data transmission: **Full**

Data storage in the Communication and storage unit:

Data storage in the instrument: **No**
